Consultation Skills

Our Clinical Skills Training Day provides hands-on, comprehensive training in the assessment and management of common clinical conditions encountered in everyday community pharmacy prescribing practice. Designed to support your development as an independent prescriber, the course focuses on clinical examination techniques, common presentations, diagnostic reasoning, and evidence-based management.

Whether you're looking for a valuable refresher of your clinical skills, or just starting out on your prescribing journey this course offers an excellent opportunity to build confidence and competence in patient assessment and management skills. We explore a range of common clinical conditions in great depth. Learning is reinforced through interactive case studies and practical examination sessions, ensuring you can apply your knowledge directly to clinical practice.

Full Day Course £149p.p.
